

FP Trax

Smart Mailroom Management

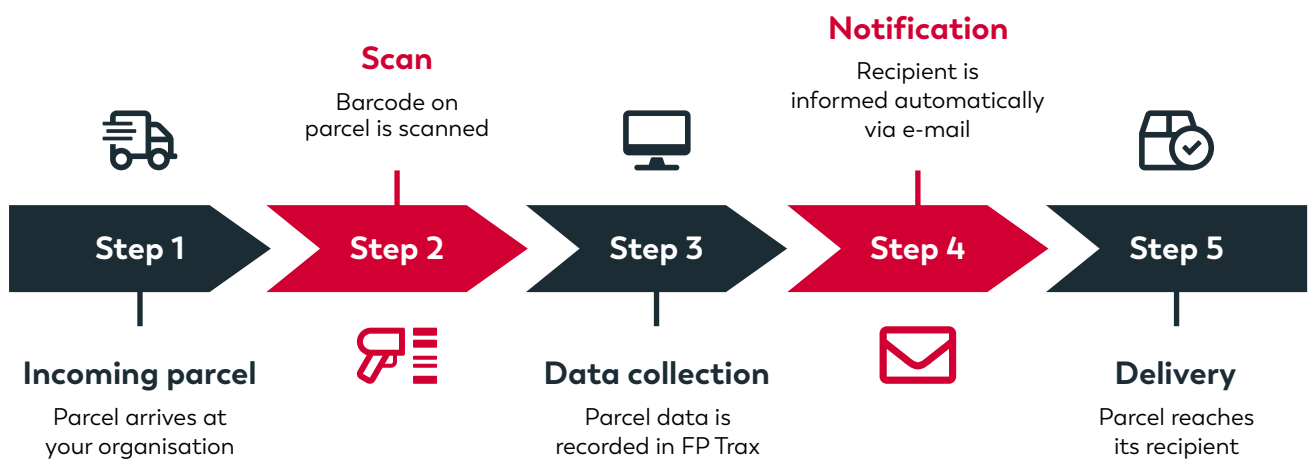

- In-House Parcel Tracking
- Cloud and On-Premises Solution
- Add-On Parcel Lockers

Smarte Mailroom Management

This is FP Trax

FP Trax is a cloud-based solution for inbound parcel tracking that logs and monitors all incoming deliveries within your organization. It links parcels, registered mail, and assets to their recipients, providing real-time updates on status, location, and delivery history. Users can easily track and manage incoming items through an intuitive interface, while recipients are automatically notified as their parcels are processed. FP Trax is available as a web application and mobile app for iOS and Android.

How FP Trax works

How parcels reach the recipient

- ✓ Parcel is delivered to or picked up by the **recipient**.
Proof of delivery: **Signature**
- ✓ Parcel is delivered to a **location**.
proof of delivery: **QR-Code**
- ✓ Parcel is delivered to **parcel locker**.
Proof of delivery: **PIN, QR-Code, NFC**

Intelligent parcel lockers for more flexibility

In collaboration with our partners, we offer parcel lockers that perfectly supplement FP Trax. These modular stations enable contactless, around-the-clock storage of letters, parcels, and goods. Reduce delivery delays, lost items and costs caused by failed deliveries.

- Available as indoor and outdoor models
- Modular design for easy expansion
- Flexible configuration of color, size and compartment count

FP Trax

Features und Add-Ons

FP Trax is available from €290 per month (excl. VAT).

Final pricing depends on your monthly parcel volume and selected add-ons. We're happy to provide a customized offer upon request.
